

Dear GPI US Team,

I am writing to express my interest in the volunteering as a Group Leader for the GPI US program. As a computer science student at Tarleton State University, I am excited about the opportunity to immerse myself in Japanese culture, make lifelong friendships, mentor and guide mentees based on my related experiences and learn more about myself through this program.

I believe that my education, research, and work experience make me a strong candidate for this role. As a computer science student, I have a strong foundation in the latest technologies and can provide guidance and support to students as they work on small group projects and facilitate discussions. Additionally, my experience as a lead student researcher in both the electrical and computer science and mathematics departments have taught me how to effectively analyze and visualize data and implement machine learning models.

I am also an active participant in various extra-curricular and club activities on campus, including being the President of the Tarleton Computer Society and the Tarleton Table Tennis Club. These experiences have taught me how to work effectively in a team and communicate my ideas to others.

I am eager to share my own life experiences to teach, motivate, and empower students. I am also dedicated to being an ambassador for my community and university and will comply with all rules and regulations established by ISA and GPI US.

I look forward to the opportunity to contribute to the GPI US program and am excited about the prospect of working with you

Sincerely,

Ifechukwudeni Teddy Oweh
