

Dear ABS Recruiting Team,

I am writing to express my interest in the internship opportunity at ABS. As a computer science student at Tarleton State University with a strong background in full stack software development, I am confident that I have the skills and passion to make a meaningful contribution to your team.

I have gained a solid foundation in programming languages such as ReactJS, Vuejs, NodeJS, and PHP, and have experience in machine learning modeling with TensorFlow, Sklearn, and Pytorch. I have also worked on data exploratory and analysis with Python Pandas, Powerbi, Matplotlib, and Seaborn. In addition, I have knowledge of API development and design with NodeJS and Python Flask, as well as experience with cloud computing, networking, and operating systems such as Linux, AWS, Linode, and Azure. I have also worked with database systems including MongoDB and MySQL, and am proficient in version control with GIT. I have experience in containerization with Docker and have used object-oriented programming concepts in my project work.

My research and work experience, including my roles as a lead student researcher in the Electrical & Computer Science Department and a student researcher in the Mathematics Department at Tarleton State University, have further developed my skills in data analysis, algorithm development, and problem-solving. In my role as a student tutor and grader for Intro to Computer Science, I have also gained strong communication skills and the ability to explain complex concepts to others.

I am excited about the opportunity to intern at ABS and contribute my skills and knowledge to your team. Thank you for considering my application. I look forward to discussing the internship further with you.

Sincerely,
Teddy Oweh.
